Terre imprime sulle superfici la spontanea imperfezione di forme e volumi propri dell'argilla. Le tre superfici tridimensionali, nei colori Cotto e Bianco, riflettono sulle pareti **trame volutamente irregolari e un ritmo materico che rievoca la qualità artigianale** dei mattoni fatti a mano.

Terre impresses the spontaneous flaws in the shapes and volumes typically found in clay onto the surfaces. The three three-dimensional surfaces, in Cotto and Bianco colours, reflect **deliberately irregular patterns and a textured rhythm that brings to mind the craft-based quality** of hand-made bricks onto the walls.

Terre verleiht den Oberflächen die spontane Unvollkommenheit von Formen und Volumen, die für Ton typisch ist. Die drei dreidimensionalen Oberflächen in den Farben Cotto und Bianco spiegeln **bewusst unregelmäßige Muster** an den Wänden und einen materiellen Rhythmus wider, der an die **handwerkliche Qualität** von handgefertigten Ziegeln erinnert.

Terre imprime sur les surfaces l'imperfection spontanée des formes et des volumes propres à l'argile. Les trois surfaces en relief, dans les couleurs Cotto et Bianco, reflètent sur les murs **des trames volontairement irrégulières et un rythme de la matière évoquant la qualité artisanale** des briques façonnées à la main.

Il sistema si basa sull'attribuzione di crediti per ciascuno dei requisiti caratterizzanti la sostenibilità dell'edificio. Dalla somma dei crediti deriva il livello di certificazione ottenuto.

LEED™ is a voluntary certification system, for the design, construction and management of high performance sustainable buildings; it promotes an integrated design system that concerns the whole building. It is developed by the U.S. GREEN BUILDING COUNCIL (USGBC), an association which provides a global approach to sustainability, providing recognition for virtuous performance levels in key areas of human and environmental health. The system is based on rating credits for each of the requisites featuring the sustainability of the building. The sum of the credits composes the certification level achieved.

EPD (Environmental Product Declaration), è una certificazione volontaria che mette in evidenza le prestazioni ambientali di prodotto/processo/servizio per migliorarne la sostenibilità. Attraverso la dichiarazione EPD, Italgraniti Group comunica a partner, operatori e consumatori, l'efficacia delle politiche di sostenibilità intraprese e i dati sull'intero ciclo di vita dei propri materiali. I prodotti certificati EPD sono richiesti dai principali sistemi di certificazione internazionali (LEED®, WELL™, BREEAM®, HQE®, DGNB®, ESTIDAMA etc.) e sono premianti nel quadro normativo nazionale relativo agli appalti pubblici.

BREEAM®

BREEAM® (Building Research Establishment Environmental Assessment Method), sviluppato nel 1990 dal BRE Global, è uno dei principali sistemi al mondo utilizzato per misurare le prestazioni ambientali e di sostenibilità degli edifici nuovi ed esistenti. La valutazione BREEAM® utilizza una gamma di indicatori e criteri di sostenibilità per valutare le prestazioni dell'edificio coprendo diverse tematiche ambientali: energy e risorse idriche, salute e benessere, inquinamento, trasporti, materiali, rifiuti, ecologia e processi di gestione.

Tutte le collezioni Italgraniti contribuiscono al raggiungimento dei crediti BREEAM®.

The BREEAM® assessment uses a range of indicators and sustainability criteria to assess the performance levels of a building, covering several environmental topics: energy and water resources, health and wellbeing, pollution, transport, materials, waste, environmental awareness and management processes. All Italgraniti collections contribute towards obtaining BREEAM® credits.

WELL™

WELL™ Building Standard (WELL™) è il primo sistema di rating per l'edilizia sostenibile che consente di misurare, certificare e monitorare le caratteristiche dell'edificio che hanno un impatto sulla salute e sul benessere degli occupanti. Il WELL™ fornisce un percorso per integrare e misurare i temi della salute umana e del benessere nella progettazione, costruzione e gestione di edifici. Per ottenere la certificazione WELL™ Building Standard™, l'edificio deve essere sottoposto a un processo che comprende una valutazione in loco e una verifica delle prestazioni da parte di un certificatore abilitato.

Tutte le collezioni Italgraniti contribuiscono al raggiungimento dei crediti WELL™.

WELL™ Building Standard (WELL™) is the number one rating system for sustainable construction designed to measure, certify and monitor the features of the building, which have an impact on the health and wellbeing of its occupants. WELL™ provides a path to integrate and measure topics of human health and wellbeing in the design, construction and management of buildings. To obtain the WELL™ Building Standard™ certification, the building must undergo a process which includes an on-site assessment and an inspection of performance levels by a qualified certifier.

All Italgraniti collections contribute towards obtaining WELL™ credits.

CAM ISO 14021

Nell'aprile 2016 il Ministero dell'Ambiente italiano ha introdotto una serie di criteri ambientali per l'edilizia, chiamati CAM Edilizia - Criteri Ambientali Minimi per l'Edilizia -, volti a facilitare l'inserimento di requisiti di eco-sostenibilità nelle gare d'appalto per interventi pubblici. L'obiettivo è quello di stimolare acquisti che minimizzino l'uso di risorse naturali e il consumo di energia, che contribuiscano inoltre alla diffusione di fonti rinnovabili, riducano la produzione di rifiuti, le emissioni inquinanti nell'aria, nell'acqua e nel suolo ed che eliminino le sostanze ambientalmente pericolose.

Grazie ad un sistema di gestione ambientale sostenibile, alla certificazione EPD e in accordo con lo standard internazionale ISO 14021, Italgraniti contribuisce ad un'edilizia di qualità e prestazioni al di sopra della media di settore.

In April 2016 the Italian Environment Ministry introduced a series of environmental criteria for construction, called CAM Edilizia - Minimum Environmental Criteria for Construction -, aimed at facilitating the insertion of eco-sustainability requirements in calls for tender of public works. The aim is to stimulate purchases that minimise the use of natural resources and energy consumption levels, which also contribute towards the spread of renewable sources, reducing waste production, polluting emissions into the air, water and soil, and which eradicate environmentally hazardous substances.

Thanks to a sustainable environmental management system, to the EPD certification and in accordance with international standard ISO 14021, Italgraniti contributes towards quality construction with performance levels above the industry average.
